DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-17 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "second means for adjusting, according to the magnitude of the highest brightness of each of the pixel blocks calculated by the first means, a brightness of a corresponding one of the subunits opposed to the respective pixel blocks". In claim 6, "third means for decreasing, according to the highest brightness of each of the pixel blocks calculated by the first means, a brightness of the corresponding one of the subunits opposed to the respective pixel blocks". In claim 12, "second means for adjusting, according to the magnitude of the brightness of each of the pixel blocks calculated by the first means, a brightness of a corresponding one of the subunits opposed to the respective pixel blocks". In claim 15, "third means for decreasing, according to the brightness of each of the pixel blocks calculated by the first means, the brightness of a corresponding one of the subunits opposed to the respective pixel blocks". The closest prior art, Yoshihara et al. (6,828,954) discloses the light emitting area of the backlight being divided into a plurality of light emitting areas and the intensity of light to be emitted from each of the divided light emitting areas being adjusted, however similarly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.
